Image Analysis using NumPy

IMAGE ANALYSIS

```
import matplotlib.pyplot as plt # matplotlib is for visualisation
```

```
from PIL import Image #PIL - Python imaging library-- Captures the image uploaded
```

```
from PIL import Image
```

```
spider = Image.open("/Users/sathvikgattu/Desktop/spider.jpg")  
spider.show()
```

```
spider
```

```
type(spider)
```

```
PIL.JpegImagePlugin.JpegImageFile
```

```
spi_arr = np.asarray(spider)
```

```
spi_arr
```

```
array([[ 0,  0,  0],
       [ 0,  0,  0],
       [ 0,  0,  0],
       ...,
       [36, 36, 38],
       [35, 35, 35],
       [34, 34, 34]],

      [[ 0,  0,  0],
       [ 0,  0,  0],
       [ 0,  0,  0],
       ...,
       [37, 37, 39],
       [38, 38, 38],
       [38, 38, 38]],

      [[ 0,  0,  0],
       [ 0,  0,  0],
       [ 0,  0,  0],
       ...,
       [38, 38, 40],
       [37, 37, 37],
       [36, 36, 36]],

      ...,

      [[105, 94, 111],
       [102, 91, 108],
       [106, 95, 113]])
```

```
plt.imshow(spider)
```

```
<matplotlib.image.AxesImage at 0x12002f4d0>
```

```
spi_arr.shape
```

```
(362, 272, 3)
```
